County of San Luis Obispo

TO: Board of Supervisors

FROM: Administrative Office / Lisa Howe/ 781-5011

DATE: 7/19/2016

SUBJECT: Thirty-day update on current drought conditions and related management actions for the Board's review of the continuing need for the March 11, 2014 proclamation of local emergency pursuant to Government Code section 8630. All Districts.

RECOMMENDATION

It is recommended that the Board receive the thirty-day update on current drought conditions and related management actions establishing the need to continue the proclamation of local emergency due to drought conditions in San Luis Obispo County.

DISCUSSION

Background

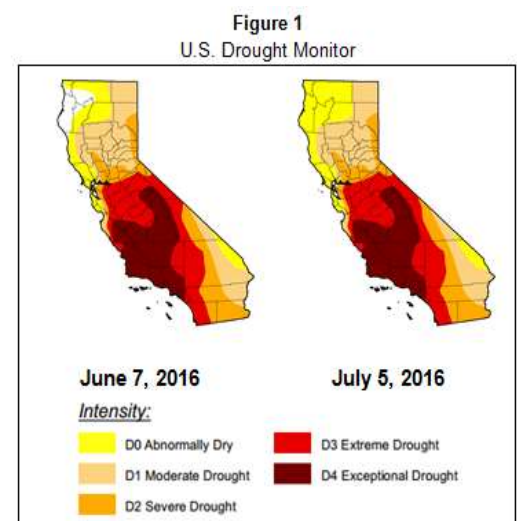

On March 11, 2014, the Board adopted a resolution proclaiming a local emergency due to drought conditions in San Luis Obispo County. Section 8630 of the California Government Code and County Code Chapter 2.80.070 (2) require that the Board of Supervisors review the need for continuing the local emergency at least every 30 days until such emergency is terminated. The Board also directed staff to return every 30 days to provide an update on the status of actions by the Drought Task Force, including a report on the analysis regarding local water conditions, local responses, conservation and outreach projects, and the State Water Project.

The last drought update was on June 21, 2016. Previous thirty-day updates are available at the following link:
http://www.slocounty.ca.gov/admin/Drought_Update/County_Drought_Updates.htm

The Drought Task Force continues to meet regularly to coordinate drought monitoring, impact assessments, responses to emergency health and safety, and public communication and outreach. The Drought Task Force prepared the Monthly Drought Update (Attachment 1) to inform the Board on current drought conditions and related management actions. Current drought conditions confirm the need to continue the proclamation of a local emergency. Provided below is a summary of the current conditions and conservaiton and response efforts.

Current Conditions

Much of the state remains in a severe drought or worse. The latest U.S. Drought Monitor report released July 7, 2016, indicates the majority of San Luis Obispo County remains at the D4 – Exceptional Drought intensity rating (Attachment 2). Approximately 59% of California is at a level D2 Severe Drought or worse with 21% of the state at a D4 intensity level. Figure 1 shows how the intensity levels throughout the state have changed in the past month.

The percentage rainfall throughout the County for the 2015-16 water year (July 2015-June 2016) ranges from 61-94% of average (Attachment 3). Reservoir levels remain significantly lower than the average percentage capacity including: Nacimiento 31% (117,090 acre feet); Whale Rock 35% (13,464 acre feet); Lopez 28% (17,777 acre feet); and Salinas 12% (2,879 acre feet) of capacity (Attachment 4).

Figure 2 shows the percentage of average precipitation from October 1, 2015 through May 11, 2016 in the Western United States.

Outlook

The U.S. Drought Monitor shows most of the Central Coast still in exceptional drought which is likely to persist. While 2016 was California's wettest year since the drought began in 2012, the drought is far from over. The Seasonal Drought Outlook is calling for the drought to persist and it appears likely that the Central Coast will remain in "exceptional" drought at least until next winter.

Impacts

Agricultural Conditions

Conditions within the agriculture industry fundamentally remain unchanged. Many producers are concerned with potential impacts from what is now generally understood as a continuation of the drought. This will be the ninth year of the past ten years with below average rainfall for most areas of the County.

Fire Conditions

Since the beginning of the year, firefighters from CAL FIRE and the U.S. Forest Service have responded to over 2,392 wildfires across the state, burning 98,088 acres. The drought across the state is about to enter its 5th year and the effect on vegetation has been severe. The past winter did result in a few heavy rains and the grass crop is heavier in many areas compared to the last 3 years. Therefore, there is an increase in fine fuel loading this year and once these grasses cure, any new start could rapidly transition into the heavier dead fuels. In 2016, abundant grass and accumulated persistent dead brush will be the primary fuels that could contribute to larger, more frequent fires compared to the previous 3 years. Normal significant wildland fire potential is expected for the month of June and significant fire potential is expected to be above normal by July.

Economic Conditions

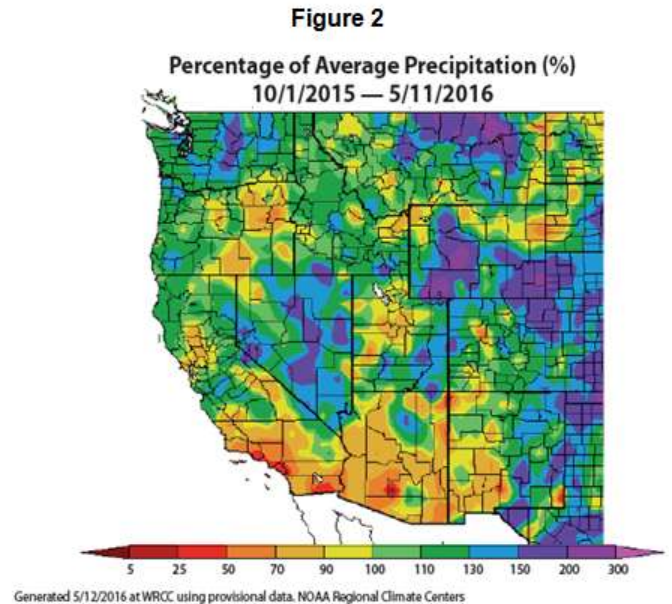

The County continues to identify assistance programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions. Information regarding drought assistance for rural homeowners has been placed on the County Drought Conditions and Water Conservation webpage. Rural Development, an agency of the United States Department of Agriculture (USDA), delivers a number of programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions.

The Governor's Drought Task Force created an online intake form for local, state, or tribal and federal agencies to document domestic water issues. The information is intended to inform and coordinate state response and mitigate drought impacts. Both agencies and individuals can complete the reporting form. Individuals with domestic water issues are encouraged to contact County Environmental Health at (805) 781-5544 or visit the state online reporting website at <https://mydrywatersupply.water.ca.gov/report/>.

County Facilities Usage and Conservation Actions

Water Conservation

Water usage data for all facilities with water billing from a vendor has been entered into the Utility Manager system. Water usage status updates for the users in the Utility Manager system and the County Operations Center show a 44%

reduction countywide in water usage in April 2016 from April 2013.

Emergency Response Planning and Emergency Actions

County Office of Emergency Services

San Luis Obispo County OES continues to coordinate with the Governor's Office of Emergency Services (Cal OES) to provide updates on the drought situation, respond to specific information requests to Cal OES, and coordinate local emergency needs. County OES continues to participate in the statewide drought conference calls hosted by Cal OES. Specifically, County OES continues communicate the severity of tree mortality located in the county.

Contingency Planning

County Public Health, the Public Works Department, and CAL FIRE/County Fire continue to develop plans to ensure there is adequate supply of water for firefighting and domestic water use in the event that a community does not have enough water. Water availability information from public water systems has been categorized into three categories; Watch, Vulnerable, and Critical. The information has been placed into a GIS mapping layer for contingency planning. These maps are available on all the County Fire Departments mobile data computers. During a fire, the fire commanders can use these maps to identify which water sources are reliable and draw down systems that are vulnerable.

Emergency Actions

The proclamation continues to provide authority for unforeseen needed actions. As also noted, proclamation provides a statement to State and Federal agencies of the seriousness of the County's situation.

The County has taken no new emergency actions specific to the drought in this reporting period.

Recommendation

Staff recommends that the Board review and receive the attached update. The update highlights the existence of continuing drought conditions in San Luis Obispo County. Review of this update by the Board fulfills the Board's duty to review the need to continue the proclamation of a local emergency due to the existence of drought conditions pursuant to Government Code section 8630. No other Board action is necessary.

Note: Any regulations issued because of the local drought emergency would be subject to Board approval. The local emergency proclamation adopted by the Board on March 11, 2014, will remain in effect until terminated by your Board.

OTHER AGENCY INVOLVEMENT/IMPACT

At the onset of the Governor's declaration and under the direction of the County Administrative Officer, a County Drought Task Force was formed. The Drought Task Force is comprised of multiple County departments, including: the Administrative Office, Office of Emergency Services, Public Works Department, County Parks and Recreation, County Fire (CAL FIRE), Agricultural Commissioner, Planning and Building, Farm Advisor, Health Agency, County Counsel, and First District Supervisor Frank Mecham. All member departments provided input for this report.

County OES continues to be in regular contact with Cal OES to receive and provide situation status information.

The Public Works Department continues to coordinate with local water purveyors and cities.

Public Health is coordinating with relevant State agencies, including the State California Department of Public Health and Emergency Medical Services Authority Health Coordination Center.

FINANCIAL CONSIDERATIONS

The long-term financial impact on the local economy, including the demand on County and other legal agency services, cannot be forecast at this time. The County continues to track drought-related costs. As of June 7, 2016, tracked labor costs associated with the drought total \$396,970.

RESULTS

Accepting the update prepared by the Drought Task Force, which establishes the existence of conditions of drought, confirms the need to continue the proclamation of a local emergency. Maintaining the proclamation of local emergency will continue to allow for the Public Works Department and other agencies to take immediate actions needed by allowing temporary reduction of certain regulatory and purchasing requirements. This will also permit County staff to assist in drought-related work and tasks outside their normal scope of duties in the capacity of Disaster Service Workers under Government Code section 3100. In addition, acceptance of the update from the Drought Task Force confirms the continuing existence of severe drought conditions and will also serve as notice to the State of our dire conditions and a reminder to all of the serious drought conditions facing the County and State.
